## PROJECT DESCRIPTION

The proposal is to construct a new roof deck and exterior spiral stairs at the rear of an existing two-story over basement, single-family residence with an Accessory Dwelling Unit (ADU). The proposed roof deck will be located atop a newly created flat roof and accessed from the existing roof deck, and the proposed spiral stairs will connect the first floor and second floor terraces.

**PLANNING CODE SECTION 241** requires the subject lot to maintain a minimum rear yard equal to 45 percent of the total lot's depth, but in no case less than 25 feet deep. The required rear yard for the subject property is 28 feet 2 inches. The existing building encroaches at maximum 21 feet 8 inches into the required rear yard and was issued Variance No. 98.948V in 1999. The proposed spiral stair will encroach into the required rear yard. Additionally, the proposed new flat roof will expand the subject building's envelope beyond that permitted by Variance No. 98.948V. Therefore, a variance is required.
